Using the XPS system the Dewalt DW717XPS aa slide compound mitre saw lights the way for others to follow. The DW717XPS slide compound mitre saw delivers a breakthrough in cutting guide technology, the XPS shadow line cut indicator illuminates the work piece using dual lights, casting a shadow of the blade onto the work piece providing fast accurate alignment of the blade for increased productivity. Boasting a powerful 1675 watt motor with 4000rpm blade speed, the 250mm diameter blade delivers an impressive 89mm depth of cut with an equally impressive 320mm crosscut capacity. The large sliding fence providing support to large material cuts at any angle or combination of angles for maximum accuracy and stability. Linear horizontal rails utilise bronze guides providing maximum precision when cutting materials up to 320mm. An innovative grooving stop allows cutting depth adjustment for rebating and grooving applications. A quick release bevel setting provides accurate and simple setting of bevel angles up to 48° both to the left and right and a cam action mitre lock function makes mitre setting faster and easier allowing quick adjustments of angles between 0-60° left & 0-50° right providing maximum versatility. The DW717XPS' compact and lightweight 23kg design delivers enormous capacity whilst being easy to transport around. Complete with a 32 tooth Tungsten carbide tipped blade, blade spanner, clamp and dust bag. Power Supply Corded Product Weight Weight 23kg Voltage 110v/240v Wattage 1675 Watt Motor Blade Diameter 250mm Maximum Depth Of Cut 89mm Max Depth of Cut Maximum Cross Cut 320mm Max Cross Cut Mitre Capacity Mitre Capacity (Left 50°)(Right 60°) Bevel Capacity Left Left 48° Right 48° No Load Speed (RPM) No Load Speed 4000rpm Depth : 541mm Length : 718mm Height : 442mm

P.S.: I bought this mitre saw brand new from a big eBay retailer my-tool-shed. When it's arrived I realised

that the saw is too big for me to move from site to site (I use public transport)- need something more compact. I packed it up and just in case I feed back on this item. Any questions please email 07778996000... (click on the full phone number)
