We have two male pups left from our litter of four. One is brown/tan & white and the other is black and white.

The mother is a tri-coloured bearded collie cross short haired collie. The father is a short brown haired collie. Both the mother and the father are loving and friendly family pets as well as working dogs.

The pups are currently nearly 9 weeks old, have been wormed every 2 weeks from 2 weeks old, have received their first vaccination, micro-chip & vet check. They will be ready to leave their mother after 23rd November once they have received their second vaccination.

The black and white male pup has a slight over-bite so is priced at £350 to reflect this. The brown/tan & white pup is priced at £400.

They have been handled and well-socialised since birth and are affectionate, playful.
