

With a heavy heart, I'm selling my Peavey 6505 plus 112 combo, in perfect AS NEW condition. Never gigged or abused, it's an incredible sounding piece of professional quality equipment and it's ready to go. If you have any questions, please email or phone. I work various shifts so can't always get to the phone - but if you leave me an answerphone message with contact number I will respond as quickly as possible.

This is a bit of information about the 6505 plus 112, - if you need more, the internet has plenty of glowing reviews and write-ups.

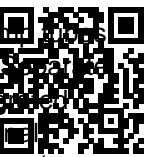

Based on the 6505® Stack, this combo offers the same classic sound in a smaller package. By sealing off the cabinet in the 6505, Peavey has created a "one-piece stack" that sets it apart from other combos. The combo's enhanced clean sound and circuitry take full advantage of the cabinet's sonic possibilities and the impressive tonal balance of well-matched components and an added reverb circuit.

Even with its more compact size, the 6505 Plus 112 can achieve the full gain and tone that the rest of the series has been pumping out for almost two decades. The 6505 Plus 112, which handles duties where stacks would be overkill, packs in five 12AX7 preamp tubes and a duo of 6L6GC power-amp tubes. Patented circuitry like the Resonance control ensures tonal shaping. Both channels feature independent three-band EQ, pre and post gain controls and Presence and Resonance controls. The rhythm channel benefits from a footswitchable crunch boost.

Live sound engineers and guitarists who record from home might also enjoy the MSDI microphone-simulated direct interface, which directs the signal to a recording device or live console. Final features include three-spring reverb, effects loop and external speaker outs and a 12" Sheffield loudspeaker in a

closed-back cab. 16 x 16 x 16 inches (switchable from 12AX7 to 6X4 tubes) Two 100W 600V power amp tubes. Four high-leak 12AX7 100W channel section. 12AX7 loop. 12AX7 100W and 6X4 100W channel section. Resonance and Presence controls for each channel. Genie's Acoustics 3-spring reverb. Integrated 12AX7 100W phone-synthesizer. R direct input. One 12AX7 100W speaker. One 12AX7 100W External speaker outputs. Rhythm channel: pre/post-gain, footswitchable Crunch boost. Lead channel: pre/post-gain control. Dimensions: 23.3" (567mm) H x 25.5" (648mm) W x 11.2" (285mm) D Weight (Unpacked): 66.2 lbs (291 kg)

A perfect Christmas present for you or a loved one, make a serious saving on new price, yours or only for £75 or near.
