Finbarrs AirGun Specialists carry out both servicing and upgrades the the SMK 78 CO2 series air rifles. We specialise in increasing the overall power of these highly accurate air rifles.

When these air rifles are sold from the manufacturer, they are under powered. By installing one of our upgrade kits, the power increases immensely but still remains within the 12 FT/LBS legal limit. This increase make these air rifles ideal for vermin control, hunting, target range and plinking.

By upgrading these air rifles you are making a great air rifle better.
