Bushnell 10x28 Offtrail Binoculars:

Bushnell 10x28 Offtrail Binoculars are wide field of view and magnification that is ideal for long-range observations. It features BAK4 roof prisms and anti-reflection multi-coated optics that produce clear and crisp high-contrast images with true color rendition. Protective rubber armouring provides a slip-resistant grip with pebble-texture and ribbing that enable more secure handling.

This binocular is nitrogen-filled, water and fogproof that perform well in extreme weather condition. The combination of right-eye dioptric correction and large focusing knob ensures sharply defined images that give you an immersive observational experience. The apparent angle of view approaches wide-angle so you'll be sure to see the whole scene in front of you. Twist-up eyecups make the Off Trail comfortable to use with or without.
