

Welsh poppy is *Papaver Cambricum* and is a tap-rooted perennial plant. It has light green leaves and bowl-shaped lemon-yellow or orange flowers 5 cm across that are produced from late spring to early autumn

I can send out 3 of these plants by first class post with the plants trimmed back for £5.00 inclusive of postage and packing. The plants have been grown in pots. However to reduce postage costs the plants have been trimmed back and have had some compost removed from the roots. At this time of year this does not create any problems as bare rooted plants. The roots are then wrapped in clingfilm to keep them moist before they are sent out in a large padded envelope by Royal Mail first class post. Please see photographs to assess size of plants shown ready for posting and the padded envelope used. Note that the plants shown in the photograph are Welsh poppies.

I can accept payment by PayPal or by Faster Payment bank transfer.

Larger numbers of plants can be sent out priced at 6 for £10 or 9 for £13.

Also this season I have 50 wood chrysomelids at £4.00 (1000s) per bag (approximately 1000 per bag), for collection only. Please contact me for more information or see my other adverts on this.
