 RRP £ 1499

Brandnew, i have won this bike in a competition. It comes with a battery, manuals and of course with a two years warranty.

Can be viewed anytime.

One of the best electric bicycles available, the VOLT™ Pulse proves popular with all types of riders and is a great all-rounder hybrid. Stylish design and a powerful 250W SpinTech™ motor means it looks great and can take you almost anywhere.

Hybrid E-bikes are designed to be comfortable on road whilst also coping with light off-road routes and this bike is perfect for both. The puncture resistant Kenda tyres grip the road with their water-displacing tread but when combined with the SR Suntour suspension fork, they prove wide enough to tackle light off-road conditions as well. The Pulse also has a few new style refinements so you'll look great on the city streets or the country trails.

You have a choice of 5 pedal assisted speed settings with a top speed of 15.5mph this hybrid electric bicycle will get you to your destination fast.

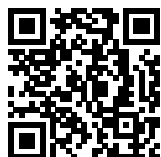

All the components used on this bike are high end: from Shimano Alivio gears to Tektro Safety "Power Cut" Brake levers, guaranteeing you a reliable, fun and very safe ride. The technology side of the bike is maintenance free and very reliable, meaning you can take your electric bike in for routine servicing at any good quality bicycle shop throughout the UK and Europe.

The VOLT™ Pulse comes as standard with a powerful Panasonic 36v Standard Lithium Polymer Battery (60+ miles). Lithium Polymer batteries are the best batteries for electric.
