The spotting scope is a zooming long range sealed scope that will satisfy the dedicated nature observers and enthusiasts alike. The cost effective kit contains spotting scope and a table top tripod for comfort long session observation. The scope employed lead free glass elements and prisms that are eco friendly. 20-60x zooming magnification provides a detailed view of the far away objects with clarity. Built in flip down objective cover is provided for the protection of objective lens when not in use. Larger eye relief offers viewing from a distance and facilitates the usage for the eye glass users and non users alike.
