

Celestron Binoculars

Location **London, London**
<https://www.freeadsz.co.uk/x-564751-z>

Durably constructed binocular that offers structural integrity along with light weight. The binocular is best for enthusiasts and amateurs that prefer medium range magnifications. The 10x magnification and larger size objective lens provides clear and sharp brighter images with real life colors. The high quality BaK4 type prisms and multi coated optics offers maximum light transmission and reduce glare from the lens surfaces. Twist up eye cups with multiple position stops and higher eye relief facilitates the best adjustment to the eye glass viewers as well as non glass.
