Comfort Lining thermoplastic denture adhesive is used to cushion the inside palate of ill fitting dentures or partial dentures to stabilize and will create a comforting fit for your gums.

Thermoplastic denture adhesive only adheres to the dentures, not to your gums, like the usual paste or cream denture adhesives.

Comfort Lining is one hundred percent Zinc free and waterproof! Being a waterproof denture adhesive the application will never wash away.

One single application will last 5-7 days

Visit our website for more details <https://www.comfortlining.com/product-p/thd-01>
