Available 16:00-22:00

Swedish Body Massage

In Swedish body massage a therapist will use a carrier oil such as grape seed oil to lubricate your skin. The oil is applied onto the skin and then the therapist uses various techniques to warm up the muscle tissue.

The aim of the massage is to warm and stretch the muscle tissue so that toxins are drained away and fresh blood flows into the muscles.

Benefits of a Swedish body massage

Body massage has been found to release positive endorphins in the brain creating a feeling of wellbeing and positivity

Massage has also been found to reduce blood pressure and promote general relaxation

Swedish body massage can improve the condition of muscle tissue and reduce aches and pains

This treatment also improves the circulation and can help to reduce levels of stress hormones

Swedish body massage – like most forms of massage, is a good way to manage stress. The massage promotes relaxation but also helps to disperse the stress hormones released into your system when you

are in stressful situations

Swedish body massage

Swedish body massage is a form of stimulation that is used to relax the muscles and to stimulate a reflexology. When the therapist uses their hands to work on the feet, the energy works through the body and each foot has a different hand to work on. This is used to apply pressure to specific points in the body to activate the body and balancing throughout the body.

So what are the benefits of a Thai foot massage?

Improved circulation in legs

Stimulates lymphatic drainage

Help removes toxins

Helps boost the immune system

Reduces stiffness and improve flexibility
