Miele dishwasher 12 years old - for parts or repair.

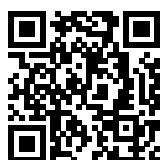

£80 collection only Bedford; loads of parts can be repaired or resold eg. horizontal cutlery tray, salt reservoir cap and other electronic parts eg. motor, pressure switch which works. Dishwasher appears to work but during draining cycle when it's almost finished draining it stops and beeps flashing inlet water/drain light. Nothing is blocked that I can see but it could be something I can't see. Some water is left in the cabinet. If you know what you're doing - you can fix this - I'm not prepared to pay for a technician hence getting rid of it. Have a look on ebay where individual working parts sell for good money!

Collection only and you'll have to uninstall it too as I don't know how..
