

Ageless Aesthetics 4U fibroblast procedure non surgical face lift with immediate resu

Location

Wales, Clwyd

<https://www.freeadsz.co.uk/x-569701-z>

Fibroblast is a non invasive procedure that tightens and promotes skin regeneration.

This is accomplished by using an intense, pulsed low-density light that passes through the epidermis and penetrates deeper into the dermis where the pulsed light stimulates cells called fibroblasts to produce fresh collagen.

Results are visible immediately as tiny dots form in the treatment area called 'carbon crusts' (similar to a scab). Proper aftercare insures quick healing with minimum risk of complications and scarring.

Key treatment areas:

- . Eye bag / eye lid
- . Face / neck
- . Worry lines
- . Nasolabial lines
- . Labial lines
- . Scar rejuvenation
- . Removal of sun spots, age spots
- . All types of lifting

This is suitable for all skin complexions. Consultation needed.

Consultation fee is £20 then it's deducted from your procedure

A deposit is needed when making a booking, which will then be deducted of the final
