Lightweight and comfortable

Comfort is key in virtual reality, and the Lenovo Explorer Headset is designed so that you'll hardly notice you're wearing it. The headset is lightly padded with an adjustable dial, so it's easy to get the right fit. And if you want to quickly jump out of the game the visor can be easily flipped up so you can return to the real world without taking the headset completely off.

Windows mixed reality

The Lenovo Explorer Headset uses Windows mixed reality technology to combine the real world around

you with virtual elements – with the ability to jump into completely virtual worlds. The Lenovo Explorer doesn't require any external sensors and lets you setup with a single cable. As you need is a compact PC with USB-C and HDMI ports, with two Quad HD lenses you'll experience beautiful, 3D content in high definition. So everything you experience looks and feels incredible.

Enjoy immersive VR experiences

With some classic VR games available from Steam like Space Pirate Trainer, Fantastic Contraption, and Universe Sandbox, you can enjoy truly immersive experiences. You can also watch 360 videos from GoPro, discover new adventures with Minecraft, and play incredible games from the Windows Store - including Skyworld and Arizona Sunshine.

Wireless controllers included

Offering complete freedom of movement, the wireless motion controllers let you interact in a natural way for greater freedom in every game. With haptic feedback, thumb sticks and button controls you can easily navigate around every game.

You can also explore your virtual world with a keyboard and mouse if you want to use Microsoft Office or search for movies. Or if you feel more comfortable using traditional console controllers - simply connect your Xbox control and you can interact with games in a classic.
