Hi, I am Adam independent professional decorator who can transform your house to the other level!

If you have old dated house, want to make those cracked and bumpy walls smooth again? I can help! I can give your house new modern sharp look.

I can help you with the colours and brands.

I can sand down all your walls and woodwork dust free to achieve the best possible quality finish, we will protect everything so you can put your house in order with our help in no time!

I will skim the walls with the gypsum-based plaster which in compare to traditional plaster the process is less messy, dries much quicker the walls are ready to paint next day.

If your walls are weak and with many cracks the cheapest solution is lining paper. Lining paper hanged by us is very strong and smooth, you will lose all imperfections.

Our painting is very fine and smooth we promise your walls will look like new.

Woodwork renovating is a time-consuming task when you want it perfect. With our experience and fantastic tools, we can do it in efficient manner.
