SHR: Super Hair Removal

Unlike traditional laser and IPL technologies S.H.R. uses rapid low level energies that provide a safer delivery in the destruction of hair follicles. The treatment of the targeted area by "sweeping" the e- motion hand piece ensures that treatment times can be up to 3 x quicker than before.

This proven treatment method of incremental heating delivers a better more efficient clinical results than traditional laser and IPL methods. This "direct to target" S.H.R. application is pain free and enables the successful treatment of blonde and, in part even white hair, tanned and dark skins equally as efficiently"

ASC: Active Skin Cooling

Treatment efficiency and client comfort is further enhanced with ASC. The incorporated advanced and adjustable water cooling allows for head pieces to be chilled to -4 ĨŠ c. ASC enhances clinical results, whilst ensuring no discomfort or epidermal damage to clients, even in for the darkest skin types.

e-motion- Technology, Fast & Effective

e-motion technology is a breakthrough in the safe & effective delivery of SHR light energy in the treatment of both hair reduction and skin rejuvenation. Incorporating a unique "wandering" action the clinician will repeatedly "sweep" the SHR hand piece over the target area whilst delivering the fast-pulse, low-energy light directly into the skin. Medium and large areas take a fraction of the time traditionally required with treatments up-to 50% shorter. Intelligent software enables simple ease of use and delivery parameters for faster more effective treatments and.
