

Gold Radar best gold detector (10 GBP)

GOLD RADAR
G O L D D E T E C T O R

GOLD DETECTOR
BUILT-IN IONIAN AND
RADAR DETECTION
SYSTEM

Distance
From 0 To 100 m
(by options)

Depth
From 0 To 50
(by options)

Battery
8 Work hours

Device system
Built-in ionic and
radar search system

built-in Ionian and Radar Detection System To Detect & Search For Gold Underground

Gold Radar : New scientific innovation in the world of gold detection and exploration devices, Gold Radar is the result of many trials and lengthy studies, which lasted for more than three years.

Gold radar device works on a built radar detection system, to detecting and searching for radioactive ionization of the gold buried underground.

The device works on the smart operating and detection systems, through professional interfaces of clarification and control, it also supported also by many advantages and features that make it the first and best of its type globally, the device gives to user a reliable acoustic results and graphical radar and visible results on the screen to the direction of the target and it is through the increase in the levels of sound and graphical indicators, It also paints targets sites on the radar screen and locating a direction, through high concentration by radar detection system and the ability to detects the targets sites and guidance the user with very clearly and integrated data about the target.
