Only selling this gorgeous build because i am moving house and will make another build with a white theme in a mini ITX case on a new white desk.

The CPU and GPU have never been overclocked since i only used a 2560x1080 resolution, 60hz monitor. The power was enough for 1080p gaming without overlocking. All games run at 100fps+. Throwing in a pair of Creative desktop speakers as a gift (worth 50£).

As you can see from the photos the cable management is absolutely flawless in this game. Many hours have been spent on it.

Always kept clean of dust at least once a month using air cans and brush.

It comes with original case box. Also gpu, psu and cooler boxes with all the accessories in them.

All prices are from amazon as a new product.

Case - NZXT H440 black /red (115£)

Motherboard - Asus Z97 Maximus VII Ranger (110£)

PSU - EVGA SuperNova 750W G2 (120£)
