

GST QST Quick Method Calculator

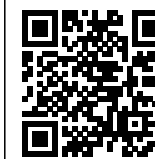

Location

East Midlands, Lincolnshire

<https://www.freeadsz.co.uk/x-574220-z>

The GST-QST Quick Method Calculator is designed to help you prepare your quarterly tax return for the Quick Method. The rates used are those for businesses that supply services. It will also calculate any ITC as a result of depreciable capital purchases (Box 106/206). Other adjustments and ITCs/ITRs are not calculated, but may be added in a future version. It was designed with the Quebec tax system in mind. There is a customizable HST calculator. Default values are set up for Ontario, but you can change them to suit your needs.. (If you're interested in any other customised version, please contact us.)
