Ecoforest wood pellet burner

This is a used item, the model is the Venus producing 7 kw of heat

It comes with

hand book, remote control unit, two lengths of insulated stainless steel pipe (one at 1metre x 150 mm, one at 800mm x 150mm), one angled elbow, one T piece, one 1.5 metres of flexible pipe, one coller ring, one cowl hat, two brackets (All in stainless steel) and one full bag of pellets.

These units are very economical to run, only requiring 240v to enable its functions e.g pellet delivery, temperature control.

Ideal heating solution for garden cabin/.
