

Plastics foam melting machine of GREENMAX MARS SERIES

Location **Scotland, Clackmannanshire**
<https://www.freeadsz.co.uk/x-578456-z>

MARS Series provides another way to do the foam compacting by melting. Heat makes the foam melt down to a container then hardened like a rock. The ingot has a better density and could save more handling cost. Mars series (Hot melt machine) is specialized in compacting EPS and PE foam and could save large space to offer you convenience. Mars series compact high-qualified EPS and EPE foam materials and easy to transport.
