â€¢ Compatible with 802.11n Draft 2.0 for Incredible Performance

With support for Wi-Fi Protected Security, you can ensure that your wireless network is safe and secure with a single button push. In addition to Wi-Fi Protected Security, the N+ router also supports 256-bit WPA/WPA2 Personal, and 64-bit and 128-bit WEP encryption to ensure that your data is protected.
