• Manufacturer's Description

• For those who need the fastest wireless connection, the Belkin N+ Router will have you flying down the fast lane. Thanks to the 802.11n Draft 2.0 technology that provides up to 300 Mbps of data throughput, and a wide variety of high-performance features, the N+ Router is the ideal choice for demanding Internet users.

• Compatible with 802.11n Draft 2.0 for Incredible Performance

Using the latest, 802.11n Draft 2.0 technology, the N+ router offers outstanding range thanks to smart MIMO (multiple-input and multiple-output) technology. This router offers enough range to easily cover most homes or office spaces. With data throughput of up to 300 Mbps, the N+ Router can handle media-intensive applications that take up large amounts of your bandwidth. The router will easily handle high-

The router features a USB port that allows you to connect a USB storage device, such as a hard drive or thumb drive, and share its contents with all the computers on the network. With an attached storage device, you can store music, videos, and photos in a central location for everyone on the network to share and access.

• Elegant, Informative Design

Featuring an elegant and smart vertical design, the N+ Router saves space and looks good on your desk. LED icons let you know at a glance the status of the connection, if security is enabled, if USB storage is being accessed, and other useful information. There's also a ""Download Speedometer"" Bar of LEDs that constantly measures the download speed of your network

• Push Button Security
