

# 039Science with Art039 workshop for kids ages 4 to 12 Patterns, Vision amp Camoufl

Location **London, London**  
<https://www.freeadsz.co.uk/x-584459-z>

Please note: Price stated is for the 2h30m long session.  
 â€

Using a 'play and learn' approach, we will explore colour pigments and patterns in Nature, linking them to vision, mimetism and camouflage.

This session will include a hands-on simple and safe 'experiment': paper chromatography to extract/separate pigments from some organic materials (e.g.spinach and carrot), and from felt pens and other inorganic materials with which the kids are familiar.

During the session we will also use a few textile based materials for a camouflage game, and online family-friendly tools such as SCRATCH junior to explore the topic further.

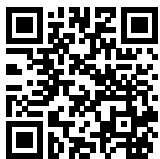

For further details and to book, please go to
