Very good condition steriliser and bottles. I fully breastfed but had a hungry baby so would top up on formula so only about 1 small bottle a day. He then decided to refuse the bottle and now will only take a mam bottle which is reason for sale as barely used and can sterilize the bottles i have in the microwave. Most of the bigger bottles haven't been used, and bought 2 tommee tippee bottles when was experimenting with different teats which are brand new too. All clean, sterilized and steriliser descaled.
