

English Vintage 1923 to 1960's Britains Ltd. Hollow Cast Lead Toy Exmoor Horned Ram Animal Model from Home Farm Series. In catalogue as number 597 (was sold with a model of a ewe).

Britains model Home Farm first appeared in 1923 with the company's desire to make more non-military models after World War One. It was very successful and hence was followed by the Britains Zoo and Circus ranges. The Farm series continued from 1923 into the 1960's. The model offered for sale here is believed to be a very early example.

There is no damage to the casting of this model, apart from one missing hoof. The ends of its legs are a bit bent, although this does not prevent the ram from standing upright. It retains its original paint work, which is somewhat patchy given there are rubs all over the ram. This play worn condition is commensurate with its age given this is a very early model, and is part of its charm.

Please study the photographs provided to make your own assessment regarding the condition of this item.

This is a private sale from a pet and smoke free home.

The ram is approximately 3.0 cm high and approximately 4.5 cm long.

I would prefer the buyer to collect, and pay cash on collection please. However, I would be willing to post to a location within the United Kingdom, at the buyer's own risk, for an additional £4.00. In this situation I would make every reasonable effort to pack the ram carefully so as to help ensure its safety. Regret no returns accepted.

I also have a small number of other vintage Britains lead animal models for sale which are well worth considering. If buying more than one item from me I would be happy to post them together and only make

one charge of £4.00. Thank you.	_____	_____	_____	_____
