

Type 1 Sub-base Limestone (390 GBP)

Location **North, South Wirral**
<https://www.freeadsz.co.uk/x-585688-z>

20 tonnes of 40mm mot type 1 including vat delivered free within our 50 mile delivery zone, if your postcode is outside our delivery zone please email us for the appropriate delivery charge.

Mot type 1 is a well graded granular sub base material used to construct the base of roads, driveways, and any kind of hard standing area that requires strength in it's base. It is a well tried and tested stone used for many years as the default base layer material. Type 1 contains a good mix of angular aggregate sized stone from 40mm down to dust. Some builders use a membrane over the mot before any top stone to stop weeds coming through, popular depth between 4 - 8 inches for driveways.
