STUNNING - Large (4ft) Identical Pair of Amethyst Geodes

Here we have a wonderful example of two stunning amethyst geodes originating from the same one piece (identical twins), both of which have been with us in our family for years but have now reluctantly become available for sale as a result of downsizing.

These impressive pieces have stood the test of time well and remain in an exceptional condition considering the many hundreds of thousands if not millions of years that they have been around.

Standing at around 4ft tall they make a bold and impressive statement in both size, stature and beauty. From the outside rear and sides there is that natural beauty of something very ancient and rugged, then move to the inner belly of the geodes and you're memorised by lustrous deep purple of the thousands of individual amethyst gems.

These very unique sizeable pieces of natural wonders are extremely rare to come across in both size, quality and identicalness - Very collectable pieces that if looked after will continue to outlive all of us :-)

In addition to these keeping amethyst with you or wearing the the form of jewelry against the sun may protect you from psychic attack, ill wishing, or paranormal harm by taking it and transforming it into positive and loving energy and turning back out toward the universe. If you have a pet that refuses to relax in its environment or a plant that just won't grow you might consider placing an amethyst of natural form in those tricky spots and seeing if that seems to do the trick in counteracting whatever negative energy resides there. Amethyst is also claimed to help curb bad habits, overindulgence, and addiction as
