I am selling my Mum's collection of Wade Whimsies. This is, I believe, from the set 2, English animals, of the first Whimsies series, produced by Wade during the period 1954-1958. Unfortunately his tail has been chipped off and lost somewhere along the way, but else he is in good condition for age. The Wade name does not seem to be on him, but they weren't printed on all the series. He was in the same box as the other Whimsies and from research, does seem to be genuine. Approx. size height 1 1/2", length approx. just over 2". From what I understand very!
