Ignis brand electric built in oven

Dimensions: 595mm wide x 598mm tall - fits a standard 600mm wide kitchen appliance unit

This oven came with our house. It works really well - I use it all the time to reliably bake cakes, cook roast dinners, etc. We are selling it because we are renovating our kitchen and it is no longer needed.

Although working brilliantly, it is not new and showing some cosmetic wear and tear around the operating knobs. I have photographed both knobs so you can see. On the oven function knob, the grill symbol is no longer there, the indicator which shows the max power is half worn off and the lightbulb symbol is mostly gone. Around the temperature setting knob, the "50" is fading and the "200" is completely gone. These settings all work exactly as they should, it's just the symbols which are failing. The oven has two pull out wire racks which are in excellent clean condition and a grill pan which is fine, but missing its handle.

This oven will serve someone well, but the sale price reflects its age and cosmetic wear and tear.

It has been removed from the kitchen and is ready for.
