

EarthForce Lightning Protection Install, Repairs and Tests

Location

South West, Hampshire<https://www.freeadsz.co.uk/x-591932-z>

EarthForce Lightning Protection can ensure that your Lightning Protection System is the best it can be, protecting you all year round. We offer full testing to the current standard of install, with Certificates of Compliance and upgrades to your Lightning Protection System to the very latest standard, BS EN 62305 as required. We can carry out remedial works to your System, whether its a full install or a loose Down Conductor that needs to be replaced or re-attached: whatever your Lightning Protection needs, we have you covered. Call 01903 724272 01903 7242...(click to reveal full phone number)

We opened for Business on the 1st May 2017 in West Sussex, with the aim to offer a professional Service to test, repair and upgrade Lightning Protection Systems across the entire South Coast.

As we are a small concern we do not have the large overheads of the bigger companies, putting us in the enviable position of being able to offer very competitive rates, with more time for that one to one service that is so important to you in regards to fulfilling your Lightning Protection requirements. Our engineers are fully trained and qualified to test, repair and upgrade your lightning protection systems, issuing certification compliant with your insurance needs, once the test or repair has been completed.

We aim to go that little bit further on a price that's just right for you in order to secure your business: it is important to us that we do the best job possible, communicating with you and allowing time to get things right first time for the best price possible, ensuring a strong, continued relationship and your repeat business.

If you are still unsure that we are the best company to meet your needs, or even if you are just curious as to what we can offer, please take a few minutes to browse our website <https://earthforcelp.com> and do not hesitate to contact us to discuss your lightning protection test, repair or upgrade requirements.

We try our very best to keep all of our training up to the very latest Standards and always use fully qualified Engineers and Technicians.

Based in Hampshire, West Sussex, UK.
