

MASTERLINE TIDELINE MULTIPLIER FISHING REEL Brand New (25 GBP)

Location

London, London

<https://www.freeadsz.co.uk/x-593457-z>

The first thing you notice is the solid design and the quality of the product it's a very robust reel its made for big fish it would make the ideal tope reel the lever drag is a big plus in this reel its so smooth to operate and the fully reinforced rugged frame should give many years of good service The power handle will make reeling in big fish an easy job. The lever drag system is both smooth to operate and very responsive. Note the small black button, this iss used as a guage when playing a fish out then if necessary you can push the button in to increase the drag to maximum. The large shaped handle grip and counter weight makes reeling in very comfortable on the hands and the easy positioning of the lever drag handle means the drag can be easily operated with the thumb. The very sturdy 1 piece reel plate is chrome plated for easy cleaning All in all this is a very well made quality reel for bigger fish the quality speaks for its self it should last years. All that is needed to care for it is a quick dip in fresh water after each session I found it very easy to use I liked the drag system it is so smooth to use. The counter balanced shaped handles make it easy to reel fish in. The reel retails at £59.95 and I think represents brilliant
