This substantial (i.e. heavy!) sideboard has been in our family since the 70s and has held up rather well. It has its visible marks/scuffs as you can see in the pictures (circular mark from vase on top, scuffs to door & baseboard) but it's looking good for 40 years old.

At some point in the 80s someone cut a hole in the left section (as you can see) to allow a plug to fit through so that section could be used for media equipment. Deep drawer has compartments for cutlery/stationery.

27.25 inches tall, 18in deep, 64in wide
