BeStar Sensortech Co., Ltd. is a Leading Domestic Provider of Multilayer Piezoelectric Ceramics and Device Solutions. The company holds a leading position domestically in the specialized field of multi-layer piezoelectric ceramic materials. It has mastered proprietary low-temperature co-firing (LTCC) technology and ultra-high layer stacking technology with independent intellectual property rights. These advancements enable sintering temperatures below 900°C and a maximum layer count of up to 100 layers, breaking the long-term monopoly previously held by Germany and Japan in this field. As a high-tech enterprise integrating R&D, production, and sales, the company is focused on the innovative development of electroacoustics, piezoelectric technology, and ultrasonic technology. The company delivers comprehensive one-stop solutions and services worldwide, tailored to meet the diverse needs of its global clientele.
